OZPIG

A message from the Shepherd family, developers of the original Ozpig...

For many years we have been noticing the deterioration in the quality of products that are being released to the outdoor market.

We believe that lovers of the outdoors want good quality gear. We also believe that they should be able to get their hands on it.

So, now we're offering it!

Find us on Facebook, or check out our website to see our next live exhibit and our full range of accessories.

Genuine Ozpig **Accessories**

4.0 LITRE CAPACITY **KETTLE** WITH WHISTLE

CARE & USE

Once boiled, remove from heat source.
Prolonged exposure to heat may cause discolouration to kettle body.

Never allow kettle to boil dry.
In the event of accidental over heating and boiling dry, it is important to turn off the heat source and allow to cool before removing.

CLEANING

For normal cleaning, use hot or warm water with a household detergent and soft sponge or cloth. Never use steel wool or other abrasive products.
If discolouration or hard deposits form due to excessive heat application, cleaning with a little vinegar or lemon juice may remove the blemish.
Wash before first use.

WARNING

Never fill to the top.
We recommend that you wear oven gloves when handling.
Periodically make sure handles and knobs are securely fitted.
